<u>OIL OBSERVED</u>	EXTENT OF OIL IMPACTED AREA	NA		
	DENSITY OF OIL /SHEEN	NA		
Total Collection Points	NA			
Total Boom Deployed	NA			
Activity	<p><u>START SOTF Team #1Activity:</u> SOTF # 1 conducted oversight of Enbridge's Team A poling re-assessment activities. Team A members Mike Neal Poling leader, Ted Reckers GPS/Leica operator. Team A conducted Target Bathymetry Location data collection; 15 points were recorded in the GPS/Leica instrument including water level at those locations. Data is downloaded into the hydrodynamic model.</p> <p>Team A conducted poling sediment agitation at several focus areas: 9.69T 1 point recorded, no visible contamination. 9.65N 7 points recorded; 3 points with light sheen 10.00C 2 points recorded, 1 point with light sheen. 10.17T 5 points recorded, 1 point with moderate sheen, 2 with light sheen and 2 with no visible contamination including delineation point 10.20S 5 points recorded, 2 points with light sheen, 3 points with no visible contamination. 10.21T 1 point recorded, no visible contamination.</p> <p>Temperature readings in the sediment ranged from a low of 65 to a high of 71 degrees Fahrenheit Bed and water temperatures where a few degrees higher reaching up 71 degrees. Areas poled today consisted mostly of sand and gravel with relatively fast flow; however areas with the most visible oil sheen and globules had soft sediment accumulation.</p>			

Health and Safety Issues	GPS operator fell in the boat hitting his mid thigh area. During poling activities and attempting to exit a shallow area, GPS operator stood up momentarily to avoid fallen branches and before he could sit down boat drifted with the water current and was abruptly stopped when it hit a submerged tree trunk. Safety officers were notified and incident was recorded. GPS operator was able to walk it off and return back to work.
